## Mobile access to scalable solutions at ISC'07

Krakow, June, 2007 -- At the forthcoming International Supercomputing Conference in Dresden (26-29th of June), GridwiseTech, a vendor-independent expert on scalable solutions, will present demo versions of applications for selected business sectors. At the booth D16, visitors will have a unique chance to see mobile access to grid-complid applications.

The engineering demo will present how the process of creating the visualisation of sophisticated simulations can be reduced dramatically. This feature can be used especially during presentations before company boards or during meetings with a client. The technology should also be of interest to media representatives, who will have a chance to prepare animated material from e.g. a disaster site and air it faster than competitive studios do.

The financial demo will demonstrate how to effectively speed up sophisticated calculations like VaR by means of the smartphome interface. This solution enables making quick analyses also outside the main office, at the same time keeping all the important data secure on the company's servers. Thanks to that, risk managers or financial advisors will not only speed up their tasks, thus being more competitive, but also be able to present the outcomes live to the client.

At the GridwiseTech's booth D16, visitors will also have an opportunity to learn more about the Principles of Scalable Solutions and receive a jigsaw puzzle with beautiful nature motif. In order to schedule a private meeting with GridwiseTech team during the conference, you can use the GridwiseTech contact form at [www.gridwisetech.com/contact](http://www.gridwisetech.com/contact).

###

**About GridwiseTech**

GridwiseTech is the vendor-independent expert on scalable solutions helping customers in speeding up data processing, removing application bottlenecks and building complete scalable systems. The company introduce modern concepts of Grid, virtualization, service-oriented architecture (SOA) and application-driven portals. GridwiseTech offers management consulting as well as comprehensive technical assistance in integration of multi-vendor components.

The company is present in Europe, Asia and the US, serving a wide variety of clients ranging from Fortune Global 500 companies to small and medium enterprises, to research and government agencies. For more information please visit [www.gridwisetech.com](http://www.gridwisetech.com).
